Structure of a flower

Ch-11Flowers

Q-4 Name the main part of a flower?

Explain them?

Ans → The flower has four main parts.

1. Sepals : → It is the green, outermost part of the flower. It covers the flower when it is a bud.
2. Petals : → They are the colourful, attractive parts of the flower.
3. Stamens : → They are present inside the petals. They produce pollen grains, a yellow powdery substance at the top.
4. Carpel : → It lies in the middle of a flower. Its lower swollen part is called ovary.
