

A	Multiple Choice Questions:  is a process of sharing information between two or more people.  a. Description b. Communication c. Transition d. None of these						
1.							
2.	When a receiver gets a m	essage, he sends back a					
	a. Card	b. Mobile	c. Response	d. All of these			
3.	The the response, the more effective is the communication cycle.						
	a. Slower	b. Quicker	c. Clear	d. Vague			
4.	The information provided in the communication should be and to the point						
	a. Incomplete	b. Neat	c. Complete	d. All of these			
_	Which of the following should be taken into account while choosing a medium of communication?						
5.	a. Timing		c. Nature of the interaction				
	b. Distance between the	sender and the receiver	d. All of these				

feedback gives a vague response to the receiver.  can help the sender justify the response of the receiver.  feers to how the sender wishes to communicate the message.  feedback provides detailed information relating to a task or the individual's performance.  State True or False:  A communication cycle does not include social media outlets.  Decoding refers to how the receiver interprets the message, depending on his circumstances and understanding.  If no feedback is given, it indicates agreement or reluctance in accepting ideas.  A receiver is the person for whom the message is intended.  Feedback can enhance a student's confidence, self-awareness, and enthusiasm for learning.  Learning is not a continuous process.  Descriptive feedback fills the gap between the present level of performance and the learning goal.  Feedback to the students should only be given after the task is over.	1-21-4
